

Pedestrian Zone Access

Background

Khazar University has a commitment to serve its neighborhood and community. This excerpt is from the University's website.

Khazar has a positive history of involvement with the local community residents and organizations. We view our role as a good neighborhood citizen seriously. Many Khazar faculty, staff and students reside in the local area. Khazar supports local events and we are actively involved in planning and development initiatives such as the pedestrian access in Buzovna campus.

Khazar University Buzovna Pedestrian Zone (BPZ) has been established to create a safer outside city campus for pedestrians and cyclists

The area of the Buzovna campus is the Speedway Pedestrian Mall. As this is a pedestrian priority area, access by vehicles is limited to those who require it to maintain and support the university mission and for emergency purposes. Pedestrians always have priority. Bicycles, skateboards, and carts also have access. Caution should be used for any vehicle entering the Speedway Pedestrian Mall area.

General Rules

Only authorized vehicles are permitted to access the Pedestrian Zone.

Vehicular access and parking permits are granted / provided by Khazar University. All vehicles (including university vehicles) must observe the posted parking time limits.

"After Hours Pedestrian Zone" permits are good after 4 p.m. and on weekends, when longer stays are okay, and are available to any department located within the Pedestrian Zone

Traveling in the Pedestrian Zone

Always remember when driving in the BPZ that you are a guest. Bicyclists and pedestrians always have right-of-way, and they may behave unpredictably.

Parking in the Pedestrian Zone

Always observe posted parking time limits. Whenever possible, park in a marked space, or at the loading dock of your destination building. If there are no marked spaces available, park off to the side - staying on the pavement - away from circulation routes, bike racks and landscaping.

Pedestrian Experience

A walkable and bikeable campus is imperative to creating a safer, healthier, and more vibrant community. The Connections Plan focuses on prioritizing the pedestrian and biking experience by expanding the zones in which walking is paramount, and driving and parking are secondary, and in certain cases, not allowed. Areas which transform roadways and prioritize pedestrians fall within the car-free zone on the Buzovna Campus, and build upon past successful public realm improvements.
